

Ring Size Chart

Directions:

Place an existing ring over the circles below. The edge of the circle should be barely visible through the ring's inner circumference.

Note: When printed out at actual size, this chart should provide an accurate representation of ring sizes. To be 100% sure that you are looking at the correct size, place a quarter in the circle in the bottom left corner. If it fits within the circle, your printout is accurate.

If it does not fit the circle, or you are still unsure about your finger size, please go to our website and order the **FREE Danforth Diamond ring sizer**. It should arrive at your address within 3-5 business days.

Thank you for visiting!
